SARADAN DESIGN MANAGEMENT
LIMITED

Established in 1996, Saradan's mission was to address the growing needs of clients with mission-critical facilities. To become specialists in the design, project management, fit-out and maintenance of data centres, computer rooms, communications centres and trading floors.

The company is at the forefront of designing and building bespoke, energy-efficient data centres; with a wide portfolio of customers both in the UK and Europe. Saradan also provide managed service solutions to data centre providers, delivering innovative data centre power and cooling management.

Business Challenge

With existing infrastructure reaching end-of-life, Saradan was looking to refresh both hardware and software elements of their IT estate in order to meet the demands of a tech-savvy customer base:

- High-performance connectivity to cope with big data applications

- Collaboration tools available anywhere, anytime

- Secure, high capacity storage to retain multiple iterations of large CAD files

- Maintain the latest releases on essential software applications

Choosing the Right Partner

"When it came to choosing a Cloud Service provider, we weren't just looking for someone who could provide a number of nameless machines in a data centre. We were looking to partner with an organisation who had experience of hosting business critical applications; someone who could add value by provide a fully managed service"

Malcolm Harris, Director, Saradan.

Malcom continues; "With Yellowspring, unlike other providers we looked at, we get computing resource, storage, hosted applications and a managed service; all within a flexible, hybrid Cloud environment".

Our Solution

The Yellowspring Cloud now provides Saradan with a resilient, hybrid infrastructure that combines both physical and virtual servers in our prestigious London-based data centre.

1 Terabyte of physical storage provides a secure environment for the archive of CAD drawings and there is an additional 300 Gigabytes of instant-access, on-demand Cloud storage. The system is rapidly scalable to meet future demands for big data, design and collaboration applications.

MS Office, Exchange and SharePoint have all been upgraded and moved to the Yellowspring Cloud, providing access to business critical applications anywhere in the world via the internet.

Management of the services has been outsourced to Yellowspring in its entirety, providing Saradan with a reliable infrastructure at a predictable monthly cost. Malcolm concludes; ". A major benefit of using Yellowspring's services is the financial flexibility it allows. We pay for a predetermined range of services, but we can adapt this at any time. The result is, we don't end up paying for services we don't need."

"With our strong attention to detail and customerservice, Saradan was comfortable in allowing us to manage their Infrastructure. The solution we've put in place is very flexible; enabling agile management of theirstorage needs."

Richard Keyms COO Yellowspring

ABOUT **YELLOWSPRING**

Yellowspring is a specialist in providing IT Support, Cloud Computing, Datacentre and Infrastructure-as-a-Service solutions to small and medium-sized businesses in London and the South East. What makes us unique is our attention to detail and focus on exceptional service delivery.

We like to view ourselves as a new breed of IT Service Provider. We are not an IT Outsourcer, a Datacentre or a Hosting Company; we are all of these things. Most of all, we are a service company.

We are judged on the service we provide to our clients and the impact that the services we deliver have on their business.

Our aim is to be a seamlessly integrated part of our client's organisation; fully understanding their business needs and using our knowledge and experience to deliver exceptional IT. We focus on what we are good at, leaving you to focus on what you are good at - your business.
